It Has the Strength You Want—

John Deere No. 6 Four-Bottom Tractor Plow

For rugged strength, good work, and long service you can depend upon the four-bottom John Deere No. 6 tractor plow.

The beams can't sag—bottoms can't get out of alignment because a heavy steel truss brace, reinforcing the regular bracing at the rear, holds the beams rigidly together with a grip that never lets go.

Beams on the No. 6 are heat-treated by a special process, giving great strength.

Wheels and axles are much stronger than on ordinary plows of this type.

The new-style, heavy-duty power lift is much stronger than ordinary power lifts.

And, of course, the No. 6 has the genuine John Deere bottoms that are the world's standard for scouring, good work, and long wear.

Come in and see this improved tractor plow.

FARM TRAINING FOR BRITISH BOYS

The first group of fifty boys coming to Alberta during the coming spring under the arrangement between the provincial Government and the Overseas Settlement Board will arrive in Edmonton about March 28th. The boys will be given a month's course of training at the Provincial Schools of Agriculture at Olds and Vermilion before being placed in employment on farms in the province. A second group will arrive about May 1st and will be similarly trained and placed in farm work.

Parties of young British women are expected to arrive about June 1st and July 1st. They will be given a month's instruction which will fit them to fill positions as domestic farm help throughout the province.

Both the boys and the girls

coming forward under this arrangement have been selected through the office of Herbert Greenfield, Agent General for Alberta in London. They are all said to be of the type most likely to be readily adaptable to conditions in Western Canada, many of them already having had experience in farm work.

DAIRY POOL TO HAVE NEW HOME

A building permit has recently been issued to the Alberta Dairy Pool Limited for the construction of a \$20,000 brick building at 10531-102nd Street, Edmonton. The building will be of sufficient size to handle satisfactorily the ever growing central office activities of the Dairy Pool.

The total acreage in pasture in Canada during 1928 was 9,528,043 acres.

U.F.A. Meeting is Held at Langford

Langford U.F.A. recently decided to hold their meetings alternatively at Langford and Rearville School Houses every four weeks, and by so doing encourage stray members from disbanded locals to join with us.

We were visited by U.F.A. and U.F.W.A. Directors on March 19th. L. H. Sutherland of Hanna and Mrs. M. Banner of Watts, who gave us a very earnest and enthusiastic account of our Pools and their relation to the U.F.A., by Mr. Sutherland's earnest appeal for everyone to join the U.F.A. we believe our membership for 1929 will be greatly increased and a lot of fresh interest shown.

It was further resolved that we have Acadia Wheat Pool Local in conjunction with Langford U.F.A. which will furnish further matter for discussion at our meetings and be of interest to all and also obliterate the necessity of extra meetings in the busy season.

It was also decided to have a U.F.A. Dance on April 1st, Easter Monday, at Langford School. Ladies please bring lunch. A good is promised.

N. Courts, Secretary.

THE MARKET FOR BUTTER

During the 12 months ended Jan. 31, Canada imported the very large quantity of 21,108,929 pounds of butter, mostly from New Zealand, while Canada's total exports of butter to all countries during the same period were only 820,252 pounds. There is evidently a very large domestic market still open to Canadian producers, and there is no reason why Canadian butter should not secure a much bigger share of the export market. In the one month of January last, the United Kingdom imported over 67 million pounds of butter, of which more than 22 million pounds came from New Zealand and nothing at all from Canada. During the past year, owing probably to a season that was unfavorable in some respects, Canada's export of all milk products except cheese showed some decline, but as compared with the preceding 12 months, cheese exports were greater by 5½ million pounds and reached the total value of \$25,531,130, which made an appreciable addition to the agricultural income of Canada, which, however, was only to a very slight extent shared in by the Prairie Provinces.—Grain Trade News.

5,000 FACTS ABOUT CANADA

The 1929 edition of that popular annual, "5,000 Facts about Canada," edited by Frank Yeigh, the well-known Canadian author and publicist is now off the press and contains a wealth of material that presents the stirring story of our national progress in crisp, concrete form. Many new features mark this issue, such as the striking expansion during the past ten years since the armistice, as well as the remarkable advance made in the last 12-months' period of "Canada's Best Year." The booklet "Sells Canada" most effectively, and is widely distributed for that purpose, while it is invaluable to any Canadian who wishes to know his own country. The 50 chapters of contents tells the all-Dominion story in a nutshell. Copies may be had at 35 cents from leading newsdealers or from the Canadian Facts Pub. Co., 588 Huron Street, Toronto.

New School Inspector Appointed

R. J. Scott, Principal of McKay Avenue School, Edmonton, has been appointed Inspector of Schools for the Oyen Inspectorate, succeeding the late F. L. Aylesworth whose death occurred recently. Mr. Scott, who has occupied his recent position for the past ten years, has had years teaching experience and is well qualified for the new duties he will take up.

Women's Institute to Meet Wednesday

The Women's Institute will meet next Wednesday, April 3rd, at the home of Mrs. Peterson. Mrs. Bassett and Mrs. Peterson being joint hostesses.

The Roll Call will be answered by "My favorite recipe."

LADIES' CARD CLUB

The Card Club met at the home of Mrs. Thompson on Tuesday evening, the prize winner being Mrs. Dawson. The prize was a set of talies and score pads. The Club will meet at the home of Mrs. Dawson next week.

Of the 630,405 barrels of oil produced by wells in all parts of the Dominion in 1928, Alberta oil fields provided 484,268 barrels.

One Nation. Two Cultures

The Dominion of Canada is a great heritage. It has many great problems to solve in order to achieve its destiny. Before Government's people can successfully cope with these problems the citizenship of the Dominion must become imbued with, fully accept, and earnestly possess the "Spirit of Confederation" which animated the leaders in the public life of this country sixty odd years ago. The names and memories of the Fathers of Confederation are held in honor, not only for what they achieved, but because of the true patriotism expressed through real sacrifice by which union became an accomplished fact.

It is no light matter to speak of the Spirit of Confederation. It was a very real reality. It breathes through every utterance of the men who found it necessary to sink political differences, submerge personal views and convictions, abandon policies dear to their hearts, and accept compromises falling short of what they desired. But they did it, knowing that only so could disaster for British and Canadian interests be averted and the future of the northern half of the continent under the British flag be assured. It was this spirit which alone made Confederation possible and carried it successfully through the stormy early years.

This same spirit is just as vitally necessary in the life of Canada today as it ever was in the past. Without it the Dominion could not have had its being; without it the Dominion cannot continue to exist. The great challenge which Canada presents to the world at large, and, of course, most vitally of all to her own people, is not in the material realm of trade and commerce, but in the spirit of the people of the Dominion composed as they are of two great races, two distinct forms of religion, speaking two languages, and the product of two cultures. Canada's challenge to the world is to be found in our success or failure to consistently live up to the Spirit of Confederation and make it a living vitality in the life of the Dominion. This is Canada's challenge to the world because the issues of world peace or war are wrapped up in the solution or exact similarity of problems in the nations of Europe and across the Pacific.

The problem before the Fathers of Confederation was whether the existence of two races, two languages, two cultures in Canada was an insurmountable obstacle to the creation of a single, united nation, and whether such a nation could exist on the basis of that fact. Their decision was that such a nation could exist, and they laid down the formula in the British North America Act. Confederation became an accomplished fact, and it has not only survived but progressed and grown to an amazing extent.

There is one Canadian of French race and language for every two Canadians of English race and language. How shall both feel that common love for home and soil which is the soul of nationality? Both races have traditions, a past of their own. On what principle and to what ends may both races have a common national future?

These vital questions cut clean through the whole of our national life today, just as they did prior to and at the time of Confederation. Shall the people of Canada, with so vast an estate to develop in common, with so great a part to play in elevating the quality of living, and so noble an opportunity awaiting them alike in the British Empire and in the sphere of international relations, always be faced with the menace of race discord, of attacks of rights that should be secure, or wrongs that should have been corrected, when scores of social and economic problems are crying out for solution? Race is like a car left with its engine running. The slightest touch will put it in gear and set it speeding towards some bitter accident.

In the nineteenth century Lord Durham's policy was the "bilingualism" of the French-Canadian. The policy of the Fathers of Confederation was the recognition of the identity of both races, both languages, both religions, both cultures. Their idea was one nation, two cultures; one nationality, two languages; one loyalty, two races.

Which policy was practical? To obliterate a whole people, or to form a nationality in which the identity of two peoples might be secure, free, developing? The Fathers of Confederation had the only practical policy, the only policy that would ensure peace, make the progress of Canada possible, and establish a new nationality in British North America.

Small Suns Compose Stars

Partially Eclipse Each Other Every Twenty-Four Hours

In Castor's solar system there is a star of the ninth magnitude known as C. It is composed of two small suns, each about half as massive as our sun and but little more than half the diameter, though of much greater density. They appear to be dying down into the planetary stage, or burned-out condition, for they shine with a reddish light and possess a much lower surface temperature than our sun. A pair of twin worlds in the making are at an average distance apart of 1,700,000 miles, and they appear to revolve round one another at great speed in about twenty hours, partially eclipsing each other every time, as seen from the earth. We do not see the effect of these eclipses until forty-three years after they occur, owing to the great distance (2,730,000 times that of our sun) of this marvelous solar system of Castor.

Fellowship Honor For

Manitoba Professor

Dr. Buller Will Be First F.R.S. In Prairie Provinces

Dr. A. H. Reginald Buller, head of the department of botany, University of Manitoba, has been selected for the fellowship honor by the Royal Society of London, England. He is one of 15 candidates on whom the honor will be conferred in May, and will be the first F.R.S. in the prairie provinces.

Dr. Buller has been carrying on research work in connection with wheat for 32 years and his valuable contributions to science in this respect caused him to be singled out for the honor. He is the author of various books dealing with wheat rust fungi.

It Has Many Qualities.—The man who possesses a bottle of Dr. Williams' Pink Pills is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

There are 320 foreign consuls and consular agents in Canada with the dozen of all J. M. Owen, the United States consular agent at Annapolis Royal, N.S.

In one month, last year, 100,000 New York families, involving at the lowest estimate 300,000 people, moved from one apartment to another.

Minard's Liniment prevents Flu.

Wool By Aeroplane

Australian Company Considering This Means Of Transport

Transport of wool by aeroplane is being considered by Australian Air Services, Ltd., in districts where camel caravans are now employed. The company in Melbourne has already received a request from a station owner in Northern Victoria for specifications and an estimate of cost of freight plans to carry his wool over a difficult 500 miles of the journey to the nearest seaport. The transport of freight in the district in which the station is situated costs about £30 per ton, and a plane will be able to transport freight over the distance in a day whereas several weeks are often required.

Toes Made Comfortable

Removes Corns Instantly

almost instantly. PUTNAM'S Corn Extractor. Shoes won't pinch you. One single drop of Putnam's Corn Extractor will remove the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for "Putnam's" the one sure relief for sore corns.

Can See Two Oceans

The inhabitants of Costa Rica say that the only place commanding a view of the Atlantic and Pacific ocean is the summit of Mount Irazu, situated in Cartago Province. The mountain is 12,600 feet high, and the Costa Ricans assert that on a clear day it is not difficult to see the waters of both oceans with the naked eye.

DO YOU SUFFER FROM RHEUMATISM

For Relief You Must Reach the Root Of The Trouble In The Blood

Sufferers from rheumatism who have found their condition unrelieved or actually growing worse while using other remedies, would do well to try Dr. Williams' Pink Pills. This tonic treatment with this medicine has proved in thousands of cases that it builds up the blood to a clear state that enables it to cast out the rheumatic poisons through the regular channels, the bowels, kidneys and the skin. When this is done rheumatism is banished and as long as the blood is kept pure and rich there will be no return of the trouble.

That Dr. Williams' Pink Pills do what is claimed for them is proved by the case of Mrs. Etta A. Muma, Saratoga, Ont., who says: "I was a helpless invalid for a year with inflammatory rheumatism. I had medical treatment and took mineral baths, but with no result. Naturally I felt utterly discouraged, and was suffering greatly. Then one day I read in a local paper of a case similar to mine, in which great praise was given to Dr. Williams' Pink Pills and I decided to give this medicine a trial. It is now with the greatest pleasure I write to tell you that in less than two months after starting the use of Dr. Williams' Pink Pills I was able to get up and walk about as well as ever I did. I can never praise these pills too highly and hope that in making my experience public it may benefit some other sufferer."

A very useful book "Building Up the Blood," will be sent free on request by The Dr. Williams' Medicine Co., Brockville, Ont. Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail, post paid, on receipt of price, 50c. a box. Try them today.

Many western Canadians will make a tour of the Maritime Provinces in June, under the auspices of the "New Outlook," official publication of the United Church in Canada, and the Canadian National Railways.

Neighbor: "What is your son taking at college?" Dad: "All we can send him."

COULD NOT WORK FOR MONTHS

Restored to Health by Lydia E. Pinkham's Vegetable Compound

Port Elgin, N. B.—"For three months, I was nervous and weak with tired feelings and could not do my work. A friend advised me to take Lydia E. Pinkham's Vegetable Compound and I have got good results from it and recommend it to others." LITA PATTON, Port Elgin, N. B. This dependable medicine is sold by druggists everywhere.

Sure Of Hoover's Support

League Of Nations Has Good Friend In U.S. President

What stand will President Hoover take in regard to United States cooperation with the League of Nations? Supporters of the League, while they have practically abandoned any hope that the States will become an active member of the League, feel that in Mr. Hoover they have the strongest support of its policies since the regime of President Wilson.

They base this belief on the fact that in 1919, President Hoover was an urgent advocate of United States entry into the League and that while bound by loyalty to his party to take an opposite point of view he will always remain at heart a strong proponent of League ideals.

It cannot be said that League supporters felt they had a genuine friend in Mr. Coolidge. Practical ignorance or tepid acquiescence was all that could be expected from the former chief executive. Always he appeared to be dominated by the small town point of view of the narrowest type of American in his dealing with the League and constitutionally he seemed incapable of thinking on an international plane.

While the new president is also bound by party considerations it is believed that by every means in his power he will strive to represent that sizable minority in his country who fervently advocate closer co-operation with the League in maintaining world security.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will find effective.

Recipes For This Week

(By Betty Barclay)

BREAD PUDDING DESSERT

1 package lemon junket.
1 pint milk.
4 slices bread.
Butter.
Raisins.
Remove crust from bread, divide lightly and cut in small cubes. Divide the cubed bread among dessert dishes and add a few seeded raisins. Warm the milk to lukewarm—not hot; add the lemon junket. Stir until dissolved; pour over bread. Let stand in a warm place until firm—then chill. Sprinkle with a mixture of sugar and cinnamon before serving.

SCALLOPED DISHES

Pour over layers of well-seasoned meat, fish or vegetable enough medium cream sauce to cover. Sprinkle with well buttered crumbs and bake until brown. When combined with starchy dishes such as potato or macaroni, use thin cream sauce. Medium cream sauce calls for 1 cup milk, 2 tablespoons flour and 2 tablespoons butter. Thin cream sauce calls for 1 cup milk, 1 tablespoon flour and 1 tablespoon butter.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting through their action in an unseasoned stomach, but this is only a manifestation of their cleansing power, no indication that they are hurtful. They can be thoroughly depended upon to clear worms from the system.

Big Job For Typemakers

Complete Set Of Chinese Type Will Take Seven Years To Produce

Few will envy a certain Shanghai printing establishment which has been working for three years to make a complete set of type, so that 10,000 Chinese characters (most of China's alphabet) can be printed.

It will exceed by several thousands the number of characters now being used in the printing of the largest of Shanghai's Chinese newspapers. Since the single symbol, in Chinese, may express a whole idea, an imposing array of type is required by the smallest printing establishment, and the newest alphabet, which will provide each of the 10,000 characters in five sizes, will be a boon.

Each "letter" must be photographed and the impression from the resulting plate tediously etched by hand. Four more years will be required to complete the work.

Time For Everything

Have a time and place for everything. Do everything in its time and place, and you will not only accomplish more, but have more leisure than those who are always hurrying, as if vainly attempting to overtake time that has been lost.

Minard's Liniment for Coughs and Colds.

PROOF OF DYES

is in the dyeing!

Words won't dye a dress, or coat, or sweater. It takes real anilines to do that. That's why Diamond Dyes contain from three to five more anilines than any other dye—by actual test. It's the anilines in Diamond Dyes that do the work; that give the colors such brilliance; such depth and permanence. It's real aniline that keeps them from giving things that dyed look; from spotting or streaking.

Next time you have dyeing to do, try Diamond Dyes. Then compare results. See how soft, bright, new-looking the colors are. Observe how they keep their brilliance. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

New Type Of Flying Craft

Being Built For British Air Ministry

Is Nearly Ready For Tests

The London Mail says that a flying machine called a "helicopter" is being built at the order of the British air ministry and is nearly ready for tests.

It is a development of the helicopter, and was invented by Vittorio Isaacson, who in 1917 collaborated with Pescara in making five helicopters. The new machine is designed to ascend and descend vertically and to hover motionless in mid-air.

Traffic Is Increasing

Two New Steamers Ordered For Vancouver-Victoria Night Service

To meet increased freight and passenger traffic on the waters of the British coast, two new vessels of the "Princess" type for night service between Vancouver and Victoria have been ordered by the Canadian Pacific.

It is announced by Captain C. D. Neroutos, manager of the British Columbia Coast Steamship service. The two sister ships are to be delivered next year, each having accommodation for 430 passengers.

Yours for the Asking

THESE bulletins and pamphlets were prepared and printed for your use. They contain a great deal of very valuable information—worked out by the staff of scientists employed by the Dominion Department of Agriculture. If any or all of them would help you in your work, or in improving your home surroundings, you may secure copies without cost—simply by marking with an "X" the ones you would like, filling in the coupon below, and mailing this advertisement to us. No postage is required.

Bulletin No. 106
"Stem Rust in Western Canada"—practical methods of rust control—no reservations in buying.
Pamphlet No. 81
"The Combined Reaper-Thresher in Western Canada"—costs of operation—experience of present users—points to consider in buying.

Circular No. 62
"Mosquito Control in Canada"—tells how to treat the breeding places of these pests so they cannot multiply.
Bulletin No. 60
"Annual Flowers"—lists and descriptions of all the annuals that will give the best results—also recommended for different seasons.

Strong Evidence That Indicates The Real Worth Of Dominion As A Field For Mineral Industry

Among the evidences of Canadian progress in 1928, none is more gratifying than that which again reveals, in stronger light than ever, the real worth of the Dominion as a field for mineral industry. The preliminary figures for the value of the country's mineral output, recently issued by the Dominion Bureau of Statistics, reach a peak well above any previous level.

There are two physical facts that carry a broad and special interest in connection with the steady ascent of Canada's mineral production in late years.

One is to be found in the sheer variety of minerals that enter into our annual output. In financial circles the wisdom of "diversity of investment" is a byword, and it may well be said that Canada's strength as a mining field likewise lies largely

in "diversity"—in the fundamental fact that Nature has invested the Dominion with mineral assets which, in variety, are matched by few, if any, countries. It is to this wide range of resources that the Canadian mining industry mainly owes both its enjoyment of present prosperity and its assurance of stable, well-sustained growth.

A second physical fact of no less importance exhibits itself in the breadth of territory afforded by the Dominion as fair ground for more intensive prospecting. A major portion of Canada has so far been subjected only to cursory study, but even so, ample information has been gained as to the potential mineral wealth of the less known regions of the country to confirm the Canadian mining industry in its title to an ample field for further development.

British Stock Farmer Uses Artificial Light

Ultra-Violet Rays Keep Animals In Good Condition

Ultra-violet light is reported to be a boon to the British stock farmer. Besides maintaining cows, race horses, etc., in good health during the sunless months of winter, it is improving their condition so that they bring a higher price in the market, according to V. M. Weall, a south of England farmer, in Surrey, who experimented with pigs. Twelve pigs were treated with ultra-violet light for three minutes daily when they were 10 to 12 weeks old, and the time of treatment was gradually increased to 20 minutes. This was maintained until the animals were sold at the age of 20 weeks. Twelve similar pigs were kept as controls without light treatment. All 24 were sold on the same day, and in every case the irradiated pigs sold for a higher price than the untreated animals. The extra money obtained for each pig was said to be 14 times the cost of the operation of the quartz lamps which were used for the irradiation.

Healthy Herds In Dominions

Packing House Inspection Shows Cattle In Splendid Condition

In fifty-six packing plants during the past fiscal year, inspectors of the Dominion health of animals branch examined 1,150,000 cattle, 610,000 sheep, 2,600,000 swine and 208,000 poultry and passed upon their suitability for human consumption. All carcasses found seriously diseased were condemned as unfit for food, while others in which the disease was localized had the diseased portions condemned. It is a fine commentary on the excellent health of Canadian live stock and the efficacy of the Dominion regulations to maintain that health, that only a very small proportion of the carcasses examined were condemned—1.59 per cent. in the case of cattle, and 0.27 and 0.26 per cent. in the case of sheep and swine. That the cattle percentage was even so high may largely be attributed to the fact that reactors from the tuberculosis eradication campaign were included in the inspection figures. There is to be no let up in the campaign against live stock disease, however, as the Hon. W. R. Matherwell has announced the opening of a new laboratory at Ottawa to be used for research work, particularly into new methods of eradicating bovine tuberculosis. Calmette vaccine, which has already been under test for five years at Ottawa, so far with somewhat negative results, but the experiments will be continued with the larger facilities now available until the claims of the discoverer of the vaccine are either proved or disproved. It is encouraging that the output of meat animals from the commercial herds of the country continue to show such a splendid percentage of healthy animals.

Great Britain Forging Ahead With No Sign Of Decadence As Some Critics Have Predicted

Keeping Pace With Settlement

Many New School Districts Organized In Province Of Alberta

Fifty-six new school districts were organized in the province of Alberta during 1928, bringing the total number of districts in the province up to 3,497. The total school enrollment is now approximately 160,000. Eighty-one new one-room schools and thirteen new two-room schools were built in country and village districts last year.

A feature of the report of the Department of Education is the reference to the increase in the number of students enrolled for technical education. In the Institute of Technology, at Calgary, enrolment last year reached a total of 1,745. Approximately 500 new students were enrolled during the year for correspondence courses. Over 1,000 more pupils wrote the departmental examinations than in any previous year. Of all the units written in the high school grades 75.19 per cent. were passed successfully.

Seeds Will Be Sun-Tested

Will Test Seeds For Purity At World's Grain Exhibition To Be Held In Regina

Grain exhibits entered in competition at the World's Grain Exhibition, to be held in Regina, in 1932, will be tested for purity in nature's laboratory. Although the exhibition itself will not open until August, the seeds entered in competition must reach the grounds before April, so that they may be sown in plots to determine the purity of the various varieties.

Can Make Nitrogen From Air

Before War, Secret Was Known Only To Germans

The world's supply of fertilizer, has been greatly augmented by the discovery of extensive nitrate fields in South Africa. However, modern chemistry has rendered us largely independent of such natural deposits. For years it has been possible, says a Daily Chronicle writer, to make nitrogen from the atmosphere, and before the war, German chemists knew the secret process by which this could be done. Despite the blockade, Germany was able to produce millions of tons of nitrogen from the air for agricultural purposes and the making of explosives. This process was a secret for some time, but ultimately we discovered it, and our chemical factories can now produce vast quantities of synthetic nitrogen from the very air we breathe.

Cheving Gum Craze In London
Cheving gum has become such a craze in London, that cleaners in trains, buses, theatres and motion picture houses are complaining of the extra work of removing the "parked" yards from under the seats. Dealers say the demand for gum grew greatly during the summer, and they believe touring Americans were responsible for much of it. The Londoners then took up the habit from the visitors.

Galleries Extend Many Miles

The underground tombs of early Christian martyrs may be visited by tourists in Rome. The galleries of these catacombs, if placed one after the other, would extend for six hundred miles.

Policeman—"If you had sound your horn this poor chap would have been able to avoid being hit by your car."

Girl Driver—"I thought of that, but I didn't want to startle him so suddenly."

First Ten-Pounders

Trained farm workers who are headed for the West, where they will contribute to the success of the 1929 harvest. They came over on the "Mellie," the first large group under the ten-pound rule, and were directed to farm work by representatives of the Canadian Pacific Railway.

Phillip Whitwell Wilson, formerly a member of parliament for South Lancashire, famous as an author and war correspondent, recently gave an address in the Town Hall, New York. He said:

All past empires have declined and fallen. Will that be the fate of the British Empire? No! With a population of forty-five millions the governs 450 millions. At the outset of the Great War her area was about thirteen million square miles. To-day it is about a million more. We must remember that empires in the past lacked means of communication. Rome built admirable roads, but their value is trivial in comparison with our telegraphs, transatlantic telephones, quick trains, ships and airplanes. Our Empire is the first that recognized that when colonies grow up it is best for them to begin house-keeping for themselves. We have a civil service which is superb; our judiciary never stood higher in ability and dignity, testifying to the rising character of the people, the efficiency of our courts. In education there is a keener and more intelligent interest than in any other era of our history.

To the advancing prosperity of the British Empire the Great War came as a staggering blow. In 1914 our national debt was three-and-a-half billions sterling; it is now 38 billions. In 1914 our taxes were not quite one billion; they are now three-and-a-half billions. In England taxation is about \$80 per head annually, as against about \$30 in the United States. The latest annual report of her commerce shows England exporting four-and-a-half billions and importing six billions. The difference was in large part made up by income from foreign investments, receipts from shipping and insurance, with goodly amounts from tourists, most of them trans-Atlantic.

B.C. Poultry Sent To Switzerland
Prizes aggregating nearly a quarter million dollars will be awarded for grain and seeds, and exhibits from all the world's grain growing countries are expected to be entered in competition.

Poultry For First Shipment Supplied By Victoria Man
The first shipment of British Columbia purebred poultry ever sent to Switzerland, was made by the B.O.P. Poultry Breeders' Association of British Columbia recently. The shipment consisted of ten White Leghorn yearling hens, all blood-tested and with R.O.P. records of from 200 to 225 eggs. The birds were bred and supplied by N. E. Plaxton, Victoria. They were shipped on the steamer "Mare Duane" which took them to Havre, France. From there they went to Switzerland by train.

One Way Out

The way to avoid having uninvited guests for week-end visits is to have no spare bedrooms, according to a man who has given a great deal of thought to the uninvited-all-night problem. "Extra bedrooms in a house invite company as surely as a peach tree in a yard invites boys," he said. "When you build a new house don't add too many bedrooms if you wish to lead a quiet life."

Electricity From Mud

Besides pigs and baths, mud is to be used as a source of electricity. A power station has been erected at Karnaup, Germany, which will utilize the mud from the Rhine River. This mud has a heat value, when extracted and dried, which corresponds to that of lignite. The dried product will be used to heat steam for the engines driving the dynamo.

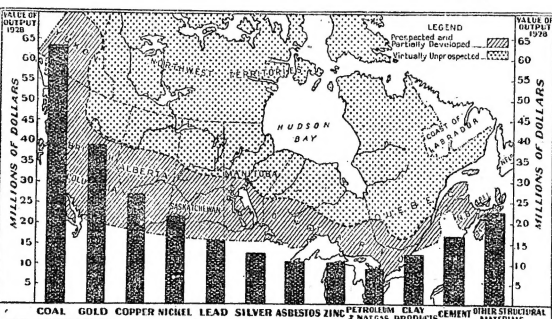

Football Coach—What experience have you had?

Freshman—Well, last summer I was hit by two autos and a truck.

Great Britain provides a market for approximately 2,800,000,000 buttons a year.

Newschick—"I use 10 brands of hair wash. I am manicured, pedicured, I get my scent straight from Paris. If this goes wrong I shall be having a bath."—Dorffbarber, Berlin.

Origin Of Butter

Swaying Motion Of Camels Caused Sour Milk To Turn To Butter

The camel is the real inventor of butter, according to the results of research made by the National Dairy Council. The origin of this food was traced to the custom of the Arabs who carried across the desert on the backs of camels sour milk in skin bags. The swaying motion of the camels caused the contents of the bags to turn into butter, which the Arabs first used as a lotion for the skin. Later they made butter by tying the bags of milk to fast horses and racing the steeds up and down for several hours. Bags of milk were also laid on the ground and beaten until their contents were churned into butter.

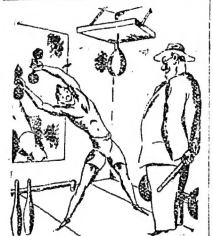

China Bans Toy Pistols

Forbids Importation Because Bandits Use Them To Terrorize People

Because bandits in interior China use them to rob and terrorize the country folk who do not know that they are only toys, the Nationalist Government has issued a regulation forbidding the importation into China of toy-pistols and air guns.

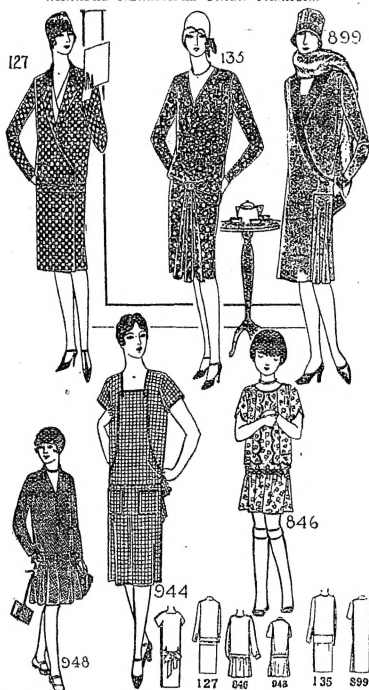

"Such toys, while not regarded as harmful and are imported only as playthings for children," explains the order, "are known to have been frequently used in the interior of China by bandits and gangs of riff-raff to terrorize the ignorant country folk. For this reason, hereafter, importation of toy pistols and air-guns, either by Chinese or foreign firms, will not be permitted."

Student—"And poor Harry was killed by a revolving crane."
Englishwoman—"My word! What fierce birds you have in America."

"Since I have been exercising my chest has expanded two centimetres a week."
"Then a year hence you will need a larger house."—Lustige Blätter, Berlin.

WINNIPEG NEWSPAPER UNION FASHIONS

No. 899—Graceful Lines. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 2 1/2 yards of 40-inch material with 1/4 yard of 36-inch contrasting.

No. 127—Popular Coat Dress. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 1/4 yard of 36-inch contrasting, and 1/4 yard of 18-inch material for separate vest.

No. 135—Smartly Simple. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 1/4 yards of 40-inch material with 1/4 yard of 36-inch contrasting, and 1/4 yard of 18-inch material for separate vest.

No. 944—Entirely New! This style is designed in sizes 34, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 2 1/2 yards of 40-inch material with 1/4 yard of 36-inch contrasting.

No. 948—Important School Frock. This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2 yards of 40-inch material with 1/4 yard of 18-inch contrasting.

No. 846—Dainty Bolero. This style is designed in sizes 6, 8, 10 and 12 years. Size 8 requires 1 1/2 yards of 40-inch material and 1/4 yard of 18-inch contrasting, and 3/4 yard of ribbon.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Wanted To See It

The recruit had been at the naval training station two weeks and had spent most of his time digging ditches, chopping trees, and filling depressions. Finally, he sought his immediate superior.

"You see, sir," he complained, "when I joined the navy they said I'd see the world, and for two weeks I've been doing nothing but re-arrange it."

Another Proof Of Intelligence

Charles Minick, a road patrolman, lay helpless in his bachelor home, near Cornwall, Wisconsin, suffering from a violent attack of rheumatism. Minick called his Alreide dog to the bedside, tied a message to the dog's collar, and repeated the name of a neighbor several times. The message was delivered by the animal, and Minick was taken to town and given medical care.

Good

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

WORLD HAPPENINGS BRIEFLY TOLD

The Prince of Wales won nearly all the principal prizes at the fourth annual show and sale of Shorthorn bulls at Birmingham.

Admiral Alfred von Tirpitz, who led the Imperial German navy during the Great War, was 80 years old March 19.

Lord Lovat has resigned from the chairmanship of the Overseas Settlement Committee owing to ill health. He has now almost completely given up public life.

The Turkish government has paid foreign bondholders the first instalment on the Ottoman debt, the total of which is \$182,000,000 and is to be paid within 27 years.

French volunteer firemen who make up the bulk of the fire fighting forces are attempting to organize the first firemen's world's fair, to be held in Paris in 1929.

The British treasury has received \$20,000,000 as the sixth instalment on the French war debt, and \$725,000 as the seventh instalment on the Italian debt.

In order to enable him to become acquainted with public affairs from the diplomatic angle, Prince George, the King's third son, has taken up temporary duties in the foreign office.

Granham Jarline, 55, former branch manager of the Royal Bank in western Canada, and for the last five years connected with a Toronto brokerage firm, died suddenly in that city.

The government of Cuba has formally notified the Canadian government that it accepts the agreement concluded at Ottawa, in January, in regard to the division of the short radio waves in the North American area.

Conquest by the air by feminine pilots was advanced by Mrs. Louise McPhetridge Thaden, 23, of Oakland, California, when she remained aloft in the lonely cockpit of her biplane for 22 hours, 3 minutes and 12 seconds to establish a new endurance flight for women.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Extremator will protect the children from these distressing afflictions.

Creatures Of Habit

We are unreasonable animals many of us. The person who sputters like a hot tea kettle because he is required to button his raincoat every morning and unbutton it every night—day after day, month after month, year after year—a long and dreary record of monotony waits like a fire siren when one little button comes off.

The Right Idea

Uncle Ezra: "My nephew, the aviation student, writes me as how he did his first 'solo' on Wednesday. He was 2,000 feet in the air."

Uncle Benn: "Well, if a fellow is going to practice singing, that's the place for him to do it!"

A Health Saving Reminder

Don't Wait

NEW APPOINTMENT

R. HENDERSON,

who has just been appointed Canadian National Railway's Industrial Agent for the Alberta district, with headquarters in the station at Edmonton. Expanding industries in the west, and eastern concerns which are looking to the opening of western branches, will be assisted by Mr. Henderson, who will do for Alberta what Mr. Roblin and Mr. Chambers, both recently appointed, are doing for the Saskatchewan and Manitoba districts. Mr. Henderson entered the services of the National system in 1912.

To Improve Maple Industry

Producers In Canada Will Ask Legislation From Government

An organization has been formed of Canadian producers and manufacturers of maple products which will submit to the Dominion Government a request for legislation to improve the condition of the industry. The chief demands will be for more stringent laws against adulteration, inspection to prevent adulteration and a campaign of publicity to secure greater consumption of maple products in Canada.

The Royal Canadian Golf Association has decided to hold the Canadian Amateur Championships on the Jasper Park Lodge course this year, from August 19 to 24.

FASHION

No. 286—Youthful Flare. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 yards of 40-inch material with 1½ yards of binding. Emb. No. 11139 (blue) 35 cents extra.

No. 259—Parisian Simplicity. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3½ yards of 40-inch material with ¾ yard of 36-inch contrasting.

No. 740—Step To Smartness. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3 yards of 36-inch material.

No. 151—For the Smart Junior.

This style is designed in sizes 10, 12, 14 and 16 years. Size 12 requires 2½ yards of 40-inch material with 1 yard of 36-inch contrasting.

No. 637—Playtime. This style is designed in sizes 1½, 2, 3, 4, 5 and 6 years. Size 4 requires 2½ yards of 40-inch material with ¾ yard of 32-inch contrasting.

No. 241—An Attractive Flare. This is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3½ yards of 40-inch material with ¾ yard of 36-inch contrasting, and 6½ yards of binding.

All patterns 25 cents. In stamps or coin (coin preferred). Wrap carefully.

SUNDAY SCHOOL LESSON

MARCH 31

THE FUTURE LIFE (Easter Lesson)

Golden Text: "Be thou faithful unto death, and I will give thee the crown of life."—Revelation 2:10.
Lesson: Matthew 25:31-46; Mark 12:28, 29; Luke 24:1-12; John 14:1-6; 1 Corinthians 15:3-20, 50-58; 1 Thessalonians 4:13-18; Revelation 22:1-5.
Devotional Reading: Psalm 23:1-6.

Explanations and Comments

The Resurrection of Christ, Luke 24:1, 2.—Early on Sunday morning after the crucifixion of Jesus, Mary Magdalene and other women came to the tomb where His body had been laid, to embalm it with the spices they had prepared. All the way they had been worrying about the great stone that blocked the entrance to the tomb. They could not move it, and who would be there to move it for them? But when they came within sight of the tomb, lo, they saw that the stone had been rolled away. Christ had risen. "Why seek ye the living among the dead?" were the words they heard. Was it true? Jesus was not there, but where was he? They were full of fear and full of joy half fearing and half believing. And then they met him. There he was, the same Jesus they had seen and doubted vanished. He was risen, even as He said.

We no longer fear what lies beyond the grave. We know that we do not really die, that we pass through death to another life. We know that we shall live again, and in that knowledge we lose our fear and find hope and joy.

"May Easter Day

To thine heart say,

Believe in God, believe also in Me."

"May Easter night

On thine heart write

"O Christ, I live to Thee."

The Promise of Christ, John 14:1-3.—"Let not your heart be troubled; believe in God, believe also in Me." In spite of everything the disciples must trust in the goodness of God, and in their Lord's own loving thought of them. Faith is still the cure for fear-trouble, the sure reliance in anxious moments. Not a nominal faith in the existence of God, but an active, overmastering belief in His goodness and wisdom, and in His overruling all things for good, is the only way to escape the danger of despair in times of danger and dread.

"Twas the Master Himself who said

To the sorrowful little band,

Facing an hour of darkness

That they could not understand."

To Asthma Sufferers. Dr. J. L. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own argument—its own best advertisement. If you suffer from asthma get this life-renewing remedy and find help like thousands of others.

Contention Is Right

Issuance of laundry receipts in Chinese will be illegal in New York State, if a bill recently introduced by Assemblyman Mark C. Kelly, of Utica, is passed. It provides that every laundry establishment, upon receiving clothing, shall issue a receipt in English, itemizing each article received. Said Assemblyman Kelly: "A Chinese laundry ticket does not mean a thing to the recipient if he is a one-language American."

A Corrector Of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience, and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will bring inflammation in the bronchial tubes.

Cloves came from the Indies and take their name from the Latin clavis—meaning a nail, to which they have a resemblance.

The onion first came from India. The onion was almost an object of worship with the ancient Egyptians.

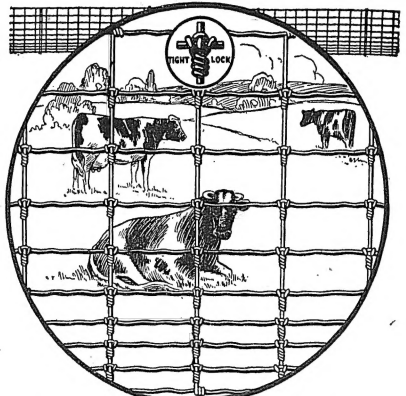

Could Not Sleep. Heart Would Start Pumping and Pounding

Mrs. Fred. P. Averill, 136-12th Ave., Calgary, Alta., writes:—"I was bothered so much with my heart I could not sleep. I would wake up in the night screaming, and my heart would start pumping and pounding. A neighbor lady told me to try

so I started taking them and I can truthfully say I am a different woman. Altogether I only took two boxes."

When Cunarders Carry Cows

Vast Difference Between Past and Present Of Steamship Travel

Amazing facts are given by E. D. Burton, of London, England, who writes of the past and present of steamship travel, and refers to the famous old "Britannia," which was the first steamer to cross the Atlantic on schedule, and which was the product of the imagination of Sir Samuel Cunard, of Halifax, Nova Scotia, founder of the Cunard Line.

For instance: the Britannia was the wonder ship of her day, yet described by the inimitable Charles Dickens as having a saloon "not unlike a gigantic bear's," with sleeping berths comparable only to coffins. Her staff comprised two stewards, a cook, a kind of cabin boy and the navigation crew. She carried a cow abroad to supply fresh milk. Her bathroom would have disgusted any traveler of today, and may have disheartened many prospects of those middle eighties.

One is the Britannia. Sir Samuel is gone too. Today the monuments to the man and his crude little steamers are the famous Cunarders which ply across the Atlantic to and from Great Britain, and Europe, and Canada, and the United States, and cruise into the seven seas of the world with their red funnels topped by a black band.

For instance: the world's fastest liner, the Cunarder "Mauretania," voyages along at about 30 miles per hour. The Cunarder "Boreangaria" houses 4,000 souls, and carries hundreds of bathrooms for passengers who can either pay the same old Britannia ticket price for accommodation undreamed of in those days, or pay as high as \$6,000 for luxury that kings could not get in luxury get by. Passengers can now hold swimming parties in the ship's pool, stage balls, or send facetious messages by wireless to friends ashore. They travel on the Cunarder "Aquilonia" three miles of carpet, benefit by her 10,000 electric lights, and 1500 push bells, and are cheered by her 2,000 yards of silk damask wall coverings. Hectic travellers cross the Atlantic in about four days from New York on the Mauretania and marvel at her fame, which has lasted 22 years, and at her record of total mileage which runs into the million.

Sultan's Son a Fiddler

After looking in vain for a rich American girl to marry and restore his shattered fortune, Prince Abdul Kadir, the son of Sultan Abdul Hamid, who today might be sultan of Turkey had not Mustapha Kemal made that country a republic, has sought permission from the minister of labor to join a gypsy orchestra as a violinist.

It is estimated that British workers spend \$150,000,000 yearly in travelling between home and place of employment.

The peach originally came from Persia.

Use Minard's Liniment for the Flu.

Will Maintain High Quality Of Beef

Grade Must Be Satisfactory To Receive Government Brand

As soon as the necessary inspectors can be appointed at local points, the Federal Livestock Department will inaugurate a policy of branded beef, with the Federal Government responsible for the maintenance of high quality of the brands which it approves. In order to qualify under this scheme of Government certification, the beef must have been slaughtered in a Government-inspected abattoir and bear the Government inspector stamp. It shall then be submitted to the Government inspector and, if satisfactory grade, the brand of quality will be affixed to it. The beef must then be retailed through an establishment approved by the Government.

Reindeer For Canada

A cable from Stockholm states that a consignment of 300 live Swedish reindeer has been shipped to Canada through a Norwegian port. This is the largest shipment of the sort ever to go forward.

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product, a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes frowny or restless, Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletcher's CASTORIA

PRIVY COUNCIL MAY INVESTIGATE GRAIN QUALITY

Winnipeg.—Possibility of Canada's "certificate final" on grain shipments to foreign buyers being challenged in the Privy Council of England, looms up.

It is learned here that because of shipments of American barley to Germany during the season just closing, which were finally found to be "scab diseased" and which caused the death of stock to which it was fed, there is quite a possibility of a legal review of the validity of the contract which exists between Canadian and American shippers and the London Corn Exchange, acting as the intermediary on such shipments.

As the facts are now known it is stated that following the death of livestock after feeding on this "dis-eased" American barley, a board of arbitration was set up in England under the rules of the Corn Exchange before whom the German grain exchanges presented their complaint.

This arbitration board, it is learned, has now completed the taking of evidence and will submit the facts, in all probability, to an English court in order that the contract between the London Corn Exchange and the foreign buyers might be tested. It is also learned that no matter how the decision may go an appeal will be taken to the Privy Council.

Under the contract referred to between the trade and the London Corn Exchange, it is provided that the Canadian government grade certificate shall be taken as final; but there is another provision to the effect that this certificate is not a warranty of quality of the shipment unless any defect in the grain is observable upon examination. It is on this provision that the legal representatives of the German grain exchange have taken their case to the British Board of Arbitration, arguing that the defect in the barley shipments from the U.S.A. was observable upon examination and that therefore the certificate, which is the same as the Canadian certificate, is not a warranty of quality.

Should the board of arbitration find this as the fact, it is highly probable that before the Privy Council the Canadian government certificate final might become the subject of close scrutiny, if not, indeed, a legal decision.

The organized grain trade of Canada and the wheat pools of Canada through their central selling agency have it is understood, subscribed to the enquiry by the board of arbitration and the outcome of its findings of fact are being awaited with considerable concern and interest here.

Many Perish In Fire

Over Hundred Persons Burned In Russian Theatre
Moscow.—Fire in a wooden moving picture theatre that had but one exit caused the deaths of 114 men, women and children, in the village of Igolniko, Vladimir province, 400 kilometers northeast of Moscow. The fire caught fire and the flames spread rapidly through the frail structure.

In addition to the dead, 11 were severely injured and six slightly hurt. Because so many of the victims were parents, the education department has taken steps to care for the orphans. The state executive appropriated 15,000,000 rubles for the bereaved families and will adopt further relief.

Earl Arrives At Castle

Southampton, England.—Amid lusty cheers from employees of the estate and hundreds of fog signals exploded by a truck pushed along the railway line, the "rancher earl," from Alberta, Viscount Earl of Egmont, and his son, Viscount Percival, arrived at the family seat, Avon Castle, in Hampshire.

Important Land Deal

Springwater, Sask.—An important land deal has been completed here by the sale by R. H. Bourk, of 15 sections of farm land to a party of Mennonites. The purchase price is said to be around \$90,000. Mr. Bourk is a prominent farmer of this district, having come here in pioneer days.

Plan Zeppelin Flight

Berlin.—Dr. Hugo Eckener, commander of the German dirigible Graf Zeppelin, states that a flight from Friedrichshafen to Rio De Janeiro, Brazil, was being considered for this year.

W. N. U. 1773

Discussing Amount and Duration of Annuities

Committee Makes Good Start At
Reparations Key Problem

Paris.—The experts committee on reparations is making a good start at its key problem—the amount and duration of annuities with which Germany's debt will be paid.

Discussion is strictly semi-official, however, and there are still wide gaps between the hopes and claims of the different parties. But there is a spirit of conciliation in the air which seemed to justify an optimistic outlook on deliberations which soon may reach a plenary session of the committee.

France was credited with the intention of claiming ten billion marks (about \$2,500,000) of an immediate payment which Germany is expected to make.

Belgium, it is stated, will ask reimbursement of six billion marks for alleged worthless forged German currency which the German invaders left behind.

Great Britain's claims in the first payment are expected to total about four billion marks (about \$1,000,000,000). It is understood that Great Britain will claim that previous agreements do not apply to the claims of the dominion and that she expects further to be reimbursed now for what has already been paid the United States on the war debt account.

Plans Another Trip Over Niagara Falls

French-Canadian Willing To Dare
Death A Second Time

Niagara Falls, N.Y.—Jean Lussier, French-Canadian, who successfully made the perilous trip over the falls last summer, caused in a rubber ball probably will dare death a second time on July 4.

Lussier went over the falls in a specially constructed ball in daylight with more than 75,000 persons witnessing the feat. He was fished from the river two hours after starting his trip by William "Red" Hill, veteran Canadian.

Lussier is planning to make the second trip in a vehicle which he calls a "parlor ball." The ball will be six feet in diameter, electrically lighted and so constructed that the occupant will be able to remain upright during the entire journey. It will be heavily padded inside to insure escape from any serious injury.

No Disarmament Conference This Year

Earliest Possible Date Will Be
Spring Of 1930

Geneva.—League of Nations circles have informed the press that there will be no possibility of holding a general disarmament conference this year.

The earliest date it was declared at which such a conference can be convoked will be the spring of 1930, but it is more than probable that it will be well along in the fall before it can be held.

This delay is due purely to the present lack of progress in the preparation for the conference.

It will be necessary it was pointed out that the League's Preparatory Disarmament Commission must have at least two more sessions before agreement can be reached on a draft project for a general disarmament convention.

A Million Dollar Prize

Shanghai, China.—A three cornered contest among wind and waves, Japanese salvagers and hundreds of Chinese pirates for a prize valued at more than \$1,000,000, is taking place off the China Coast, eighty miles from Shanghai, within the Yangtze estuary. The prize consists of the North German Lloyd steamer "Gieseler" which was wrecked on the treacherous Hutton Rock.

Alberta House Proposes

Edmonton, Alta.—The third session of the sixth Legislature came to a close here, March 20, at 5:45 o'clock after His Honor the Lieutenant-Governor William Egbert had consented in the name of His Majesty the King, to the passage of a large number of bills and had formally accepted on behalf of His Majesty the supply granted the House.

Requests For English Charities

London, England.—Several requests to English charities are contained in the will of R. M. Hume, formerly of the British Columbia Electric Railways, who died here recently. The estate amounted to \$700,000.

Long Search Rewarded

Father Finds Son Stolen About Forty
Years Ago

Kansas City, Kansas.—Forty years of search, his life and fortune spent in quest of the babe, his boy who was kidnapped from a cradle, was rewarded when A. A. Whitte, 60, was reunited with his son, F. H. Bixler.

The son, now 41 years of age, is a prosperous farmer of Kent, Ohio. His mother died at his birth.

The child's maternal grandmother, Mrs. Sarah Lewis, ran away with the boy from their home in Emporia, Kansas. A man named Alfred Bixler disappeared from Emporia at the same time. The boy grew up with the name of Bixler.

Danube River

Overflows Banks

Families Lose Everything In Worst
Flood Since 1872

Braislava, Czechoslovakia.—Thousands of families along the right bank of the Danube have been bereft of their homes, cattle and other belongings by the worst flood since 1872.

The great river, which is choked with millions of tons of thawing ice, was rising steadily and threatened further disaster.

Church bells tolled along its 1,800 miles length, warning dwellers near its banks to flee for their lives.

MARSHAL FOCH SUCCUMBS AFTER LONG ILLNESS

Paris.—Marshal Ferdinand Foch, famous generalissimo who led the allied armies to victory in the great war, died at his home after a lengthy illness. He was 77 years old.

Although it had long been apparent that the great general was fighting his "last campaign," his warrior heart would not give in and day after day he fought off the inevitable end with grim courage, but a combination of heart trouble, kidney disease and a lung infection were too great at his age.

On February 26, the Associated Press was authoritatively informed that the marshal's death seemed only a matter of days—a week, perhaps, or ten days. But the marshal, with indomitable will, held off death, even longer than his doctors thought possible. It was sudden collapse of his heart after several days of improvement that brought death to the intrepid warrior.

"The foremost fighter in the great war," displayed in illness the same grit that he had displayed as the commander-in-chief who led the allied armies to victory in the great war.

The national funeral accorded him is the sixth in the history of France. The five men who were previously so honored were: Presidents Carnot and Faure; Pasteur, the scientist; Gambetta, the statesman; and Victor Hugo, the poet.

Canadian Bank For California

San Francisco, Calif.—Organization of a new bank, the Canadian Bank of Commerce (California), was approved by the state banking commissioner. The action makes the delegation formed of representatives San Francisco branch of the Canadian Bank of Commerce, a separate entity from the main organization, operating under a state charter.

URGES TARIFF REPRISALS

Hon. Hugh Guthrie, acting Conservative leader, in the budget debate at Ottawa on March 7, urged retaliation by Canada in the forehanded economic brush with the United States.

Prince Decorated By Master Mariners

Receives Temporary Insignia Of
Office While Regular One Is
Being Made

London, England.—The Prince of Wales at the annual banquet of the Master Mariners, was adorned with a temporary insignia of office, an ornate badge and chain, while the actual insignia in gold and jewels is being made. It was the first meeting in his official capacity with the body to which the King last year appointed him "master."

Cabinet ministers, ambassadors, and many prominent men were present. The prince, after an allusion to the presence of the high commissioners of the Dominions, announced amid cheers of proposal to make the company an imperial body by increasing its membership by one hundred. All of the new members had been master mariners resident in the Dominions. The prince said he regarded the proposal as a very important move and one which would serve as a great imperial link.

Says Doukhobors Are Not Communists

Look On World As One Community
States Peter Veregin

Winnipeg.—Stating that communism, so-called, was nothing but a "changing of seats," Peter Veregin, spiritual head of the Christian community of all Doukhobors, asserted in an interview here that Doukhobors were not communists in the accepted sense of the term.

They looked upon all the world as one community, headed by Christ, and looked upon the country in which they were a community unit.

Mr. Veregin declared that it had not been Doukhobors, but Russians living on the borders of the Christian community and wrongly considered members of it, that had been involved in trouble with educational authorities in British Columbia.

New Submarine Device

Washington, D.C.—The submarine "Lang" device which recently proved successful in tests off the Florida coast is to be furnished to the entire submarine personnel of the navy, it was learned recently. Seven hundred "lungs" have been ordered by the navy for use on its four V-type submarines. Bids for 3,300 more will be called for soon, it was learned.

MY ANGELINE

Evangeline Weil, Grand Prize

low in other days. Wolfe Gilbert and Mable Wayne have won "My Angeline," based on the "Evangeline" story and, no doubt, many other Evangeline songs will make songs. We sing about "Michigun," their appearance and add to the name of this quaint Nova Scotia valley of apple blossoms. The authors of "My Angeline" were also co-authors of "Ramona," "Chiquita" and many other popular numbers.

Trains Meet In Head-On Collision

Nineteen Meet Death In Train Wreck
In Ontario

Parry Sound, Ont.—Through an unexplained mistake in the interpretation of orders, two crack Canadian National Railway transcontinental express trains loaded with sleeping passengers crashed head-on at Dro court, a siding 46 miles north of here.

Members of train crews met death when the heavy engines and the baggage cars of the trains were telescoped and passengers in a colonist car on the west-bound train were hurled to death, some before the eyes of helpless trainmen and passengers.

Some of the dead may never be identified owing to the fierceness with which the flames devoured all within the car.

Railway officials estimate that 19 persons were killed, though late tonight but six of these, all members of the train crews, were listed among the identified dead.

The passengers burned to death in the colonist car are believed to have been mostly immigrants bound for new homes in the West. Many of them were without relatives or friends in the Dominion.

The colonist car which caught fire was of wooden construction. This type of car is fitted with a stove which passengers are allowed to use for preparation of their meals during the long journey from the seaboard to the prairie provinces. The interior of these cars is wooden. It is believed that the crash overturned the stove and the car took fire from the coals which were spilled out.

The passengers, many of them asleep in their berths when the trains crashed, were caught without means of escape. Emergency trains were sent out from divisional points when news of the disaster was flashed out. The injured were placed aboard and rushed to hospital here. Some died en route.

Representative From India

Will Attend National Conference On
Education At Vancouver

New Delhi, India.—The National Conference on Education at Vancouver, in April, will be probably the first occasion on which the Indian states have been represented as a separate unit of the British Empire. Lawrence Rushbrook-Williams, foreign secretary of the State of Patiala and noted historian, is the official representative of the native ruling princes and he left for Vancouver on March 22.

ALBERTA FIGHTS PLAN FOR RETURN OF RESOURCES

Edmonton, Alta.—Protesting that return of the natural resources to Alberta on the same basis as was returned by the Dominion government to Manitoba, the Saskatchewan government was unfair to Alberta, Premier J. E. Brownlee delivered a lengthy exposition of Alberta's position on the subject in the legislature.

Grounds on which Mr. Brownlee objected to the same settlement of the resources question with Alberta as with Saskatchewan, were outlined by the premier as follows:

The Dominion had made Alberta an offer, including the return of school lands and school lands funds; a settlement of the parks question on the same basis as other provinces and an arrangement that, when the financial considerations ultimately were decided upon there would be a transfer of natural resources with the present subsidy but with no increase. This is the same offer made to Saskatchewan, but that province is objecting to continuation of the present subsidy, now amounting to \$750,000 annually, arguing that it should not be fixed until the subsidy rises to \$1,200,000 annually, the maximum.

It had been suggested that settlement would be made by the Dominion on the same terms with both Saskatchewan and Manitoba, said Mr. Brownlee.

If this arrangement were carried into effect, the net result would be that Alberta's subsidy would remain for all time at \$562,000 a year, while Saskatchewan would receive annually \$750,000 this being entirely due to the accident of Saskatchewan having passed the population basis of the earlier agreement by which a larger subsidy would be paid, even though when the two provinces were created in 1905 there had been no discrimination.

WHEAT GRADING IS SUBJECT OF OTTAWA DEBATE

Ottawa.—The marketing of Canada's 1928 wheat crop came before parliament in no uncertain way recently. Following reports from the west of dissatisfaction with the work of the board of grain commissioners, and the way the crop was handled this year, three resolutions were placed on the order paper of the House of Commons. One asked that in grading wheat, its protein content be taken into consideration. A second referred to the mixing of grain, and a third condemned the board of grain commissioners for issuing the so-called "hybrid" ticket. It was on a recommendation of the committee on agriculture that it be empowered to investigate all these points at one time that the discussion burst forth into the Commons and forced the budget debate to give way.

To the various and severe criticisms which have been levelled at the board of grain commissioners, Hon. James Macdonald, minister of trade and commerce, said: "To discuss charges against the board of grain commissioners when the board has not had an opportunity to give evidence as to why they ruled or failed to rule in a certain way, I think is unfair. So far as I am concerned I have found the board of grain commissioners at all times anxious to assist in the administration of the grain act in the interests of the producer. Whether they have made mistakes of judgment or not will be brought out in the evidence before the committee."

He declined to comment as a minister of the crown on a public servant until the latter had been given the opportunity to defend himself. He accordingly urged the application of the committee that its scope be enlarged, be granted by the House. The members of the board would then come before the committee to give their side of the case.

Speed Boat Title Captured By Seagrove

English Driver Adds This To Auto-
mobile Racing Laurels

Miami Beach, Fla.—The International Speed Boat racing title went across the seas to England as the result of a race devoid of competition.

Major H. O. D. Seagrave added the water title to his automobile racing laurels when he sent his patched and leaking "Miss England" creeping across the finish line on Biscayne Bay recently five minutes behind Gar Wood's "Miss America VII." He was officially credited with winning the two-hour race with three points, as against two for the United States speed-boat king.

Wood's boat flashed around the two-mile course in the elapsed time of 11 minutes, 45.05 seconds, for an average speed of 61.275 miles an hour. The Englishman finished in the time of 12 minutes, 50.40 seconds, for an average of little more than 42 miles an hour.

The victory went to the English driver on the basis of points scored, Wood having been forced from the first heat yesterday with no points.

Seeding In Peace River

Ten Acres Of Wheat Seeded On
March Nineteenth

Edmonton, Alta.—A special to the Journal from Spirit River, in the Peace River country, says: The Blueberry settlement, twenty-five miles west of Spirit River, has the rest of the country shaded for early seeding. Jack Burrows, a rancher of Blueberry, seeded ten acres to Marquis wheat, March 19th. This is believed to be the earliest seeding on record in the North.

Work on the land in Edmonton district got off to a start on March 19, when a large dice swung into action on the provincial government farm at Oliver. This is said to be one of the earliest starts on the land in ten years.

Horses Win Against Turtle

Fort Arthur, Tex.—Fisherman A. Wiltz dragged four horses to a seine and hatched a 1,350 pound turtle from the Gulf of Mexico. The turtle whose protective shell had been cut, perhaps by a ship's propeller, put up a hard fight before the horses finally won. It was estimated to be more than 300 years old.

Jasper Park Lodge will open on May 21; Minaki Lodge a month later.

The Stuff Life Is Made Of

An Episode Of The Brave Dwellers Of Distant Places
(By M. H. Conquest)

Way up north, there's a silent drama of life that must be seen to be appreciated. You get a glimpse of it now and then in an odd way when reports come in from those brave dwellers of the distant places, whose business it is to stand on guard for health.

You leave the ribbon of steel far behind, some 88 miles, and at last arrive at a house of healing where a well known flag reminds you of hospital life "over there." It is a Red Cross Outpost, small, efficient, and ever active in the service of the suffering.

Saturday night and thirty below. The Swiss truck driver had a big load to deliver to the little hospital. New beds and bedroom comforts were eagerly expected. Every ward full and a man with a splintered knee waiting for the new beds from Edmonton, sitting up all night with the courage of the North in his blood. Childbirth, flu, measles, and accident, all in the day's march to the Red Cross nursing sisters.

Cold that had the sting of the Arctic, the steely coil of the land of Northern Lights. Strangely fitting was the broken English of the man who spoke of Hice (Hythe), and said he was "Fraz ter de marcer."

An old pioneer lay dying that night in the little lonely ward of the Northern Outpost Hospital. For twenty years he had worked off and on for a certain farmer. Now the end was near. There was but one wish the dying man expressed. He must see his old employer once again. That was all he asked of life, a look.

Sixty miles away was the home-stand, but what was no less to the men of the North. Death was calling, and life heard and obeyed.

Over an unbroken trail three horsemen in relays made that sixty mile trip in weather far below zero. Ten at night and a household asleep when the word was brought of the sick man's last request. Out of bed, pulling the man of the house, hurried into his clothes while a horse was saddled ready for the return trip. On, on through the cold country of stars overhead, and snow and ice underfoot. Seven hours of hard riding, when the biting frost nipped ears till they were white.

Just in time to enter the ward ere the passing of his old friend. No time to place this for language, only that language of the soul that shines through the eyes. "The sick man," he heard and said, "Hello," and the other sped by his bedside, twisting his cap shyly and quietly answered "Hello."

All day the rider of the night sat there by his man's bedside, little said, yet the air was charged with sympathy of silence and affection.

When all was over the rider looked at nurse and gently said "I am sure glad I came in Nurse."

Alberta Highway

Edmonton, Calgary, Lethbridge and other Alberta towns will be connected with British Columbia and the United States Pacific coast states highway system by gravelled roads this summer. The contract for the last gap of the Red cross, known as the "Wheat-to-Oranges" highway, has just been awarded. Construction of the MacLeod-Pincher section will start at once, and the Lethbridge-New Dayton link will follow.

Many Building Projects

Building projects already planned in Edmonton for this year exceed \$2,000,000. Those in sight in Calgary total more than \$5,000,000 including three big industries, the Dominion Bridge Works, the Manitoba Rolling Mills and the Dominion Wheel and Foundry Company. The precision Machine Works of Calgary announce a \$150,000 addition to their plant.

"Mrs. Jones has all the luck. She has just lost her husband, and the drapers announce a special sale of mourning." Moustique, Charlerd.

W. N. U. 1778

Advice For Poultry Raisers

Simple Remedy Will Cure Cramp In Young Stock

The chick season has opened with weather that is not at all favorable for rearing. Long spells of wet weather will result in many additional cases of cramp in young stock.

With cramp a chick loses the use of its feet, the toes turn upwards and the bird simply hobbles along on the lower joint of its leg. This should not be confused with leg weakness, which deprives the chick of the use of its legs altogether and the bird lies huddled up on the ground.

The obvious remedy for cramp is to ensure that the brooders and runs are kept dry without being too dusty. Birds that are affected may be removed and have their legs anointed with camphorated oil. First warm the oil and paint the legs with a small brush. Place the birds in a well-ventilated box and repeat treatment a few hours later. By the following morning all traces of cramp will have gone.

Leg weakness is mostly brought about by depriving the chicks of an earth run. From a very early stage a chick simply must have access to earth; deprive it of this and the chances are ten to one that leg weakness will appear.

Dogs Are Intelligent Friends

Records Show Fidelity Has Been Proved In Many Ways

And there are human beings who imagine the dog is not a true and intelligent friend to man. Instances of astonishing intelligence and accurate reasoning in dogs have been noted on many occasions. They have hurried for help when some one they guarded children with greater fidelity than some humans; rescued many from watery graves; protected homes from invasion by strangers, using what we call instinct which may be regarded a form of reasoning that guides the actions of the brute creation. Dogs are great friends. They show us side. They accompany through a life of hardship a beggar man; they guide the blind man through the traffic of a city, and prove themselves most loyal in any sort of emergency.

Telling Hies

A bishop was paying a visit to a certain parish and decided to address the children of the Sunday School. He had noticed many posters referring to the "Bishop's Visitation," and accordingly began his talk by asking the children the meaning of the word "Visitation."

"Please, sir," replied a youngster, "it's a plague sent by God."

A Good Substitute

"Dad," said his son Charles, "do you think they will ever find a substitute for petrol?"

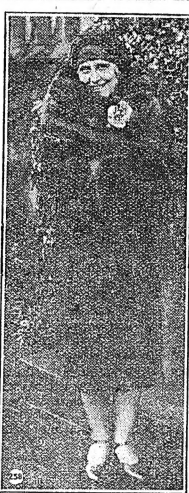

"They have one now, and I wish you'd give it a trial."

"Fah!" retorted Charles, "I've never heard of it. What is it, anyway?"

"Shoe leather," retorted his father.

Hubby (feeling a twinge in his back): "I believe I'm getting lumbago."

Wifey: "What's the use, dear? You won't understand a word they say."

GERALDINE FARRAR

On tour of the Pacific Coast, the Prima Donna is seen at the Empress Hotel, Victoria, where she stopped for a few days to enjoy the balm of the Japanese current.

Nothing To Worry About

Little Danger Of Letter Writing Becoming Lost Art

According to a Tokyo (Mass.) paper manufacturer, the art of letter writing is fast becoming as obsolete as the use of good English. Not long ago, \$15,000,000 worth of personal writing paper was used yearly. Consumption amounts now to only \$10,000,000 a year. He named radio, the telephone and the telegraph as the factors chiefly responsible for the decrease in personal correspondence.

The one as made out seems to be a complete one for the plain citizen. The use of good English, however, is not so much in vogue as it once was. But we doubt that letter writing is or will become a lost art. Those who have thoughts worth putting on paper still record them and will continue to do so. Letters which have been unwritten because of modern facilities for communication probably would not have added much to the art of letter writing if they had been written.

Making Them Fresh

Mistress: "Get me a dozen eggs and see that they are fresh. Each one should have the date of laying on it."

Maid (returning): "Are these all right, ma'am?"

Mistress: "Yes, those are right."

Maid: "I told the young man at the grocer's that they must have the date on so he wrote it on at once."

Eighty-Two Years Service

Miss Elizabeth Gadsby, known as "Polly," who started as a girl of nine in the elastic-web factory of Turner & Co., Ltd., Leicester, England, has been working there for 82 years, and attains her 92nd birthday in April. She has refused to consider retirement.

Selected Settlers From Britain

British Government To Finance Plan To Send Farm Workers To Canada

A new assisted passage scheme to provide Canadian farmers with British workers was announced by the Department of Immigration. Young men in the British Isles who have not been able to find the present £10 steamship fare, are to be recruited and after examination by Canadian immigration authorities will be lent their passage money by the British Government. The movement will start this spring, it is expected, and several thousand men will probably be brought out this year.

The proposal will embrace a limited number of unemployed miners, physically fit, but not necessarily of the skilled farmer class, who come under the present assisted passage scheme.

A survey of the various provinces is at present being conducted by the department, and the number of men to be assisted will depend upon the demand for agricultural workers.

The new scheme is explained to be quite different from the miner-harvester scheme of last year. The men must demonstrate a desire to settle permanently in this country, and no provision is made to provide return fares at the end of the harvest. None of the expense is to be borne by the Canadian Government.

While applicants need not have farm experience, they will be carefully chosen with regard to physical fitness and willingness to accommodate themselves to conditions.

The new program is to be supplementary to the various assisted passage schemes already in effect. The most important of these is the £2 steamship rate for agricultural families, with free passage for children.

Many Apartments In Buckingham Palace

And Large Number Of Rooms For Servant Staff

In Buckingham Palace there are over 200 rooms. These include forty bedrooms (thirty for servants), ten private apartments for the King and nine for the Queen, thirty State apartments, and twenty box and luggage rooms.

The servant staff numbers about 250 men and maid servants. There are about sixty housemaids, a housekeeper, and four assistant housekeepers. Many of the men-servants are married and live out.

There are usually ten motor-cars in use for the King and Queen, about twenty for the use of members of the Household, and a dozen for conveying luggage, servants, and so on to and from railway stations.

Quite Satisfactory

Jones and his wife had been having words, and Mrs. Jones did not forget to taunt him with his shortcomings.

"Why," she exclaimed, with an air of disdain, "you are not fit to clean my boots."

Jones paused a moment, removed his pipe and drawled: "Well, then, clean them yourself!"

"What do you think of the board of directors of the new company?"

"Half of them are capable of nothing, while the rest are capable of anything."

Ponies Of Jasper Have Winning Ways

Tourists Become Attached To Mountain Cynosures and Take Them Home

If a far spittin' squint-eyed cowboy introduced you to a mountain pony which had been christened with all the sacred rites of a wrangler's religion, "T.N.T.," "Hellfire," or with any other name that suggested anything but gentleness and mildness, you might be slightly suspicious as to the horse's behaviour.

But what's in a name? The ponies of Jasper National Park, Alberta, are the opposite to what their names stand for—that is, most of them. Though full of energy, especially on the homeward trek, they are thoughtful, kind and gentle. They have the best of manners, and can be trusted in the face of anything, even a wasp's nest or a porcupine.

Many tourists have taken such a liking to the ponies, reports Major Fred Brewster, famous outfitter and guide at Jasper, that they have bought them and had them shipped to their homes. The most recent purchase was made by Miss Marie Creveling, of St. Louis, Missouri, who bought "Sandy," one of the best saddle ponies in the park. Miss Creveling spent the summer at Jasper Park Lodge, and during her stay, "Sandy" was the favourite pony. Consequently they became close friends, and there was nothing else for it but that "Sandy" should go to St. Louis—which he did.

Required Quick Thinking

School Teacher Kept Her Head When Inspector Called Unexpectedly

Here is a good school inspection story that has come out of Oregon, but really comes from England, where, in certain districts, denominational teaching by nuns and other religious personages is not approved by school-board members that are out of harmony with the tenets of the belief such teachers entertain. A school inspector reached such a school on a surprise visit one forenoon long after the hour locally allotted by law to religious teaching. The teacher was on her knees praying, head bent, oblivious to all but her devotions. The children also, were all on their knees in prayer. Aroused by the opening of the schoolroom door, the praying teacher turned her head and recognized the dressed inspector. She acted with wonderful presence of mind. Knocking on her desk for attention she announced: "Children, you may now rise. Your prayer has been answered. The inspector has arrived!"

Begins At Home

Good nature, like charity, begins at home. We are never more ready to quarrel with our neighbors than when we are dissatisfied with ourselves. When we look with disapproval on our own doings, it is difficult to be enthusiastic over the course that others are following.

A motorist usually has the same opinion of a pedestrian's walking that the pedestrian has of the motorist's driving.

Water at 106 degrees F. is called "hot"; at 98 degrees, "warm"; and at 87 degrees, "tepid."

Shows Rapid Development

Important Aspects Of Airplane Flights Over North Country

The recent epoch-making flight of Canadian planes from the vicinity of Châteaufort Inlet, on Hudson Bay, out to civilization, directs attention to the rapid development of northern transportation in Canada, says the Department of the Interior, through its Natural Resources Intelligence Service. The flight was made under winter weather conditions and the planes were equipped with skis. The story of the successful trip out from the winter headquarters of the prospecting expedition at Mistake Bay, on the west shore of Hudson Bay, is not remarkable solely because of the use of skis and the winter flying conditions for such flying was accomplished in March, 1921, when several planes flew into Fort Simpson, on the Mackenzie River, in almost the same latitude. There are much more important aspects to the accomplishment of Northern Explorers.

The two planes flew across uncharted and practically unexplored country from the town of Peace River, and made the first landing in the Northwest Territories at the trading post at Simpson. Mineral wealth—oil—was the lure then as in 1928, and communication was established with the north some three months before the opening of river navigation. In that respect the flight was successful, but there were weeks of anxiety following before one of the two planes returned safely and landed on Bear Lake, near Peace River. Both planes had met with minor mishaps in landing at Simpson and Indian craftsmanship and native glue were requisitioned in successfully repairing the propeller of the plane which flew back to civilization.

Getting Into A Groove

Nothing Is Achieved By Following Path Of Least Resistance

There is a wide gulf between what is possible and what is actually done. We are born with great gifts, but we are also born lazy. We want more than anything else, to be contented. We hate things that unsettle the opening of river navigation. In that respect the flight was successful, but there were weeks of anxiety following before one of the two planes returned safely and landed on Bear Lake, near Peace River. Both planes had met with minor mishaps in landing at Simpson and Indian craftsmanship and native glue were requisitioned in successfully repairing the propeller of the plane which flew back to civilization.

The Rocking Chair

Has Long Been A Subject Of Controversy Between Men and Women

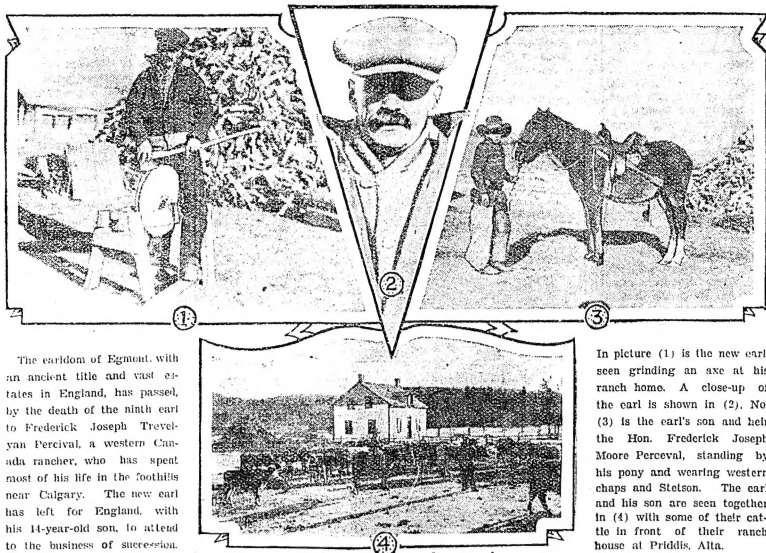

At last a book has been written about the rocking chair. It should fill a long-felt want, for there must be a great many people who have wondered as to the origin of this familiar institution. It is appropriate, perhaps, that this new book should have been written by two authors, a man and a woman, for casual observation would seem to warrant belief that the rocking chair has been a more prolific subject of controversial discussion between men and women than any other article of domestic furniture.—Providence Journal.

Apples were originally brought from the East by the Romans.

"Fifteen shillings too dear for a hat? But perhaps with a head the shape of yours a brim alone will do." -Nagels.

SUCCEEDS TO EARLDOM

The earldom of Egmont, with an ancient title and vast estates in England, has passed, by the death of the ninth earl to Frederick Joseph Trevelyan Percival, a western Canadian rancher, who has spent most of his life in the foothills near Calgary. The new earl has left for England, with his 14-year-old son, to attend to the business of succession.

In picture (1) is the new earl, seen grinding an axe at his ranch home. A close-up of the earl is shown in (2). No. (3) is the earl's son and heir the Hon. Frederick Joseph Moore Percival, standing by his pony and wearing western chaps and Stetson. The earl and his son are seen together in (4) with some of their cattle in front of their ranch house at Pridits, Alta.

LOCAL ITEMS

Lester Berrv has been under the weather this week with a bad cold.

Mrs. D. A. Maclean, of Coliholme, has been spending a week with Mr. and Mrs. McPherson.

Keep April 12th open for the Women's Institute entertainment, followed by a dance.

Born—To Mr. and Mrs. Sam Squires, on Wednesday, March 20th, a daughter.

Mr. and Mrs. Suttor who have been in Calgary for the past two weeks, returned home Saturday.

The local schools close today for the Easter holidays, and will re-open Monday, April 8th.

Mrs. Allan Marr, who has been at the Cereal Hospital for the past three weeks, returned to her home on Friday.

Miss Enelix, stenographer in a bank in Hanna, is spending this week visiting her sister, Mrs. Lawrence Jones.

Mrs. Davis, who has been nursing in Calgary for the winter months, returned home on Saturday.

The Women's Institute will meet next Wednesday afternoon at the home of Mrs. Peterson, Mrs. Bassett and Mrs. Peterson are joint hostesses.

Mrs. E. B. Allen underwent a critical operation at the Cereal Hospital on Thursday, March 21. There were two doctors in attendance.

R. A. Morrison, who for some years was employed as bookkeeper for some years at the Service Garage, returned from California this week and will act as salesman at the Service Garage.

Mrs. W. A. Hurley spent the past week in Calgary.

Rev. A. G. Gay purchased a new Tudor Ford car last week.

B. Knibbs is to be the new vulcanizer at the "Service Garage."

The Bowman Bros. have been working on the land for the past week.

Mr. and Mrs. T. O. Stephenson of Excell, visited at the home of Mr. W. Milligan on Sunday.

Murdock McPherson has been ill for the past week with flu and unable to attend school.

Mrs. H. Johnston, of Cereal, has been visiting at the home of her brother, A. V. Brodine this week.

Mrs. K. N. Myhre and granddaughter made a business visit to Cereal on Monday.

Mrs. Sherrer, of Los Angeles arrived here this week and will visit for a month with her daughter, Mrs. Harry Strong.

Mrs. Loader went to Edmonton to spend the Easter holidays with her little son who is in the hospital in that city.

The amount raised at the Ladies Aid tea, which was given by Mrs. Lloyd Robinson and Mrs. Clarence Peterson, amounted to \$15.00.

Miss Margaret Young, who has been in Youngtown for the past few months, arrived home on Friday to spend Easter vacation at the home of her parents, Mr. and Mrs. Jas. Young.

Miss Audrey Neff, who has been attending Normal School at Calgary, arrived home on Friday and is teaching at the Collingwood School this week after which she will spend the Easter vacation at home of her parents, Mr. and Mrs. C. E. Neff.

Mr. O. Blair, of Nace, purchased a Tudor Ford car last week.

I. W. Demen made a business trip to Calgary this week.

On March 13th, at the regular meeting of the Ladies' Aid Mrs. Wm. Meade donated the sum of \$15.00 to the Ladies' Aid.

Stewart Jones is spending his Easter holidays at the home of his parents, Mr. and Mrs. John Jones of Wiste.

Mr. Korek and Mr. and Mrs. Steadlie, teachers at the local school, left Thursday afternoon by motor for Calgary, where they will spend their Easter vacation. They also intend to attend the teachers' convention at Edmonton.

Miss Mary Greene of Cereal, who has been attending High School here, left on Wednesday to spend the Easter vacation at the home of her parents, Mr. and Mrs. Ralph Greene.

Mr. and Mrs. H. T. Lenzgraf, who have been visiting their family in different parts of the United States, for the winter months returned home on Thursday morning.

Everybody likes to read Zane Gray's books—everybody likes to see a play based on Zane Gray's writings, so, for Friday and Saturday nights of this week, Mr. Hughes has secured "Under the Tonto Rim," by Zane Gray.

WEEKLY EDITORS PLAN TRIP TO PEACE RIVER

A trip through the Peace River country is planned by the editors of Alberta Weekly Newspapers following the annual convention of the Alberta division of the Canadian Weekly Newspapers Association which will be held in Edmonton during the month of August.

R. A. MACPHERSON

—of Delta, Director of the Alberta Wheat Pool, who was in the Chinook district last week in the interest of the Wheat Pool.

Here and There

(214) For the first time in history, an airplane has been carrying furs from the wilds of Northern Manitoba to the Winnipeg market. Tulek Kenton, aviator, left Cranberry Portage for Brackley settlement recently, taking Del Symonds, veteran trader, whose aim was to beat all competitors who take a month to travel by dog team.

During 1928 between 5,500 and 5,700 Prince Edward Island furs have been shipped abroad, an increase over the 4,250 shipped the preceding year. These have been loaded without a single known casualty. Since the middle of October furs have been shipped to Norway, Sweden, Scotland, Germany, Czechoslovakia, Austria, Finland, France, Holland, Switzerland and Japan.

Forty-two years of service with the Canadian Pacific Railway without having broken any of the company's rules or otherwise earned a mark against himself is the unique record held by Arthur W. Savane, engineer, who has just retired on pension. Mr. Savane, who is well known throughout the Eastern Townships, fired the train that laid the first steel on the Montserrat, New Brunswick and Portland.

Don't forget the date of the tea which is to be given by Mrs. Lloyd Robinson and Mrs. Clarence Peterson on Saturday, March 23rd. Proceeds to go to the Ladies' Aid of the United Church.

NOTICE

To: OTTO FENSKE, Chinook, Alberta.

TAKE NOTICE that in the Supreme Court of Alberta, Judicial District of Calgary an Order Nisi has been granted on March 1st, 1929, by the Masters in Chambers at Calgary in action No. 29618 commenced by Netherlands Investment Company of Canada, Limited against Emma Lodge Moore as Mortgagee to recover \$1,885.71 and for sale and for foreclosure in respect of a certain mortgage dated 22nd day of March, 1917, covering the W. 1/2 of Sec. 31-25-S.W. of the 4th Mer. Alberta.

AND FURTHER TAKE NOTICE that after the first day of December, 1929 a motion may be made, to order the said property for sale, or for foreclosure; unless before that date you as second mortgagee exercise your right to redeem or take other steps in Court to protect your mortgage security. Hugel & O'Keefe, Plaintiffs' Solicitors.

DATED at the Court House, Calgary, Alberta, on the 23rd day of March, 1929.

"C. H. SMITH" Clerk in Chambers
Approved: "L. F. CLARKY" M.C.

MORTGAGE SALE OF VALUABLE FARM PROPERTY

UNDER and by the virtue of the Powers of Sale provided by the Land Titles Act, under a certain mortgage which will be produced at time of sale.

There will be offered for sale by public auction at the Acadia Hotel, in the Village of Chinook, in the Province of Alberta, on Saturday the 20th day of April, 1929, at the hour of 2 o'clock in the afternoon, the following property, namely: The south half of section twenty-one (21), in township twenty-eight (28), range seven (7) west of the 4th meridian excepting thereout and therefrom all mines and minerals and the right to work the same.

Terms of the sale to be 20 per cent cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserve bid and free from all incumbrances, save crop share lease expiring the 31st day of December A.D. 1929, and taxes for the current year.

The vendor is informed that the above property is situated five miles from Chinook and that 225 acres have been cultivated. Soil is clay loam, and there are two miles of two-wire fence. There are no buildings on the property.

For further particulars and conditions of sale, apply to

Brownlee, Porter & Rankine 436 Lougheed Bldg., Calgary, Alberta

DATED at Calgary this 12th day of February, A.D. 1929.
